

## AAK-10 BAG KICKER

### FEATURES

- Controlled bag handling for gentle product treatment and conditioning
- Used for 90 degree corners on bagging lines
- Heavy duty construction
- Pneumatic driven cylinder
- Compact design eliminates separate footprint
- Automated operation, no operator input required
- Fully adjustable to suit application
- Fully guarded for safe operation

Aurora Bag Kickers showcase great design allowing optimum kicking efficiencies in a compact footprint.

Using a pneumatic ram, the bag is kicked onto an adjoining conveyor or platform for further handling.

The kicker has been designed with safety in mind ensuring no pinch points or bag damage, providing a gentle and safer operation.
